

This is the master list of *Sloper Wartime Provisionals* (SWP's) derived from information in the '*Gault Catalogue of G.B. Perfins*', with update information reported to the Catalogue Editor since publication of the individual sections. Since the original list of SWP's appeared on the Perfin Society Website (**1st August 2013**), there have been many additional postage stamp values reported along with changes in 'die in use' date ranges, dates, and new dies.

The following collectors have contributed new information since the original list:

Michel de Beukelaar, Finn Binderkrantz, Kim Bjarnt, Jack Brandt, Terry Comper, Nigel Hall, Ian Hamill, Keith Kimber, Peter Maybury, Ron Mills, Thomas Mørkeberg, Steve Netten, Rosemary Smith, Richard Smolnicki, Gerry Soutar, Stephen Steere, Jeff Turnbull, and Barrie Williamson

Latest totals are **787 DD**, involving **3,294 DDF**.

List & stamp details compiled by Roy Gault - Correct to **11th July 2019**.

The list that follows the colour illustrations shows the Catalogue Numbers and Letters involved for *all* known 'Sloper Wartime Provisionals', along with their die in use date ranges, earliest and latest known dates from actual stamps or covers, and a tally of the number of DDF stamps for each of the stamp issue code letters 'Q', 'R', 'S', and 'T'. Details of the *actual stamp denominations* are also shown in the listing.

Note - VLint = Van Lint Catalogue (1959), Tilles = Harvey Tilles Catalogue (1975),
n/k = source not known.

DDF	Count		
0	10	1.3%	42.7% Rare
1	177	22.5%	
2	149	18.9%	
3	97	12.3%	48.2% Middle of the Road
4	83	10.5%	
5	56	7.1%	
6	52	6.6%	
7	38	4.8%	
8	31	3.9%	
9	24	3.0%	
10	11	1.4%	9.0% Common
11	18	2.3%	
12	15	1.9%	
13	9	1.1%	
14	6	0.8%	
15	2	0.3%	
16	3	0.4%	
17	3	0.4%	
18	1	0.1%	
19	2	0.3%	

The table above shows a simple tally chart of how many dies have '0' stamps listed against them, '1' stamp listed, '2' stamps listed, etc. The inference being that any die with a small number of DDF will be quite rare, whereas those with larger numbers are likely to be a little easier to come by. The divisions are drawn arbitrarily, feel free to put the dividing lines where you think fit and re-compute! For reference the die with **19 DDF** is "CK" (**C4110.01ap**).

The following figures show how many different dies are known on each stamp value. However, experience will tell you that the 1d and 2½d Dark colours, and the 1d and 2½d Light colours will feature most prominently. The rarist of the small sized issues 'Q' and 'R' is the 11d plum found on just 5 different Perfin dies.

King George VI - Definitive issue (low values).

Printing details

Printed in photogravure by Harrison & Sons, in sheets of 240, 20 rows of 12.

The first three values in the series were issued a few days ahead of the Coronation of King George VI, with the bulk of the rest issued progressively over a period of two years. There was one late-comer, the 11d plum, which appeared late in 1947.

Type Q1 - Edmund Dulac (head), and Eric Gill (frames). Value in a circle.

Type Q2 - Edmund Dulac (head), and Eric Gill (frames). No circle around value.

Type Q3 - Edmund Dulac.

29-12-1947

5 dies

Due to wartime shortages of printing inks, the colours of the first six low value definitives were changed to a lighter colour of the original. The changes took place progressively over a period of just over a year between July 1941 and September 1942. The individual introductory dates are shown above each stamp for information.

King George VI - Definitive issue (high values).**Printing details**

Recess-printed by Waterlow & Sons. Issued in sheets of 40 (5 rows of 8). Only the 10/- stamp was printed in a single pane of 40, the other values were printed in two panes of 40 and then guillotined.

Designers

- *Edmund Dulac* for the 2/6d and 5/- values.
- *George R Bellew* for the 10/- and £1 values.

Once all the low values had been issued (by May 1939), except for the 11d plum, the high value series began to appear, again progressively. Eventually there were four denominations which used two basic designs, and two changes of colour. The first to be issued was the 10/- Dark blue, followed by the 5/- Red, and one day after the outbreak of WWII, the 2/6d Brown. Colour change replacements in 1942 saw the introduction of the 2/6d Yellow-green, and the 10/- Ultramarine. Again, there was a late-comer to the series in the shape of the £1 which was not introduced until 1st October 1948, the day after the £1 Royal Silver Wedding stamp was withdrawn from sale. All four values were replaced on 1st May 1951 when the 'Festival' high values were issued.

0 dies

Note: There are **4 dies** where a 2/6d stamp is known, but the colour (brown or green) is unknown. There are also **4 dies** where a 10/- stamp is known, but the precise colour (dark blue or ultramarine) is unknown.

King George VI - Definitive issue (low values) - Changed colours.

2-10-1950

A change in colour for the 4d from Grey-green to Ultramarine was the first to come into effect in October 1950. The other five values all followed on the same day, 3rd May 1951. On that same day a new series of high value stamps was also introduced, along with two commemoratives to celebrate the opening of the 'Festival of Britain'. What a day that was for philatelists!

Only two **KGVI Commemoratives** are known with a Perfin - "RU/DC" (R5560.01p) on 2½d (SG491) issued in 1946, and "W/P" (W5900.01p) on 2½d (SG493) issued in 1948.

SG491 - 1 die

SG493 - 1 die

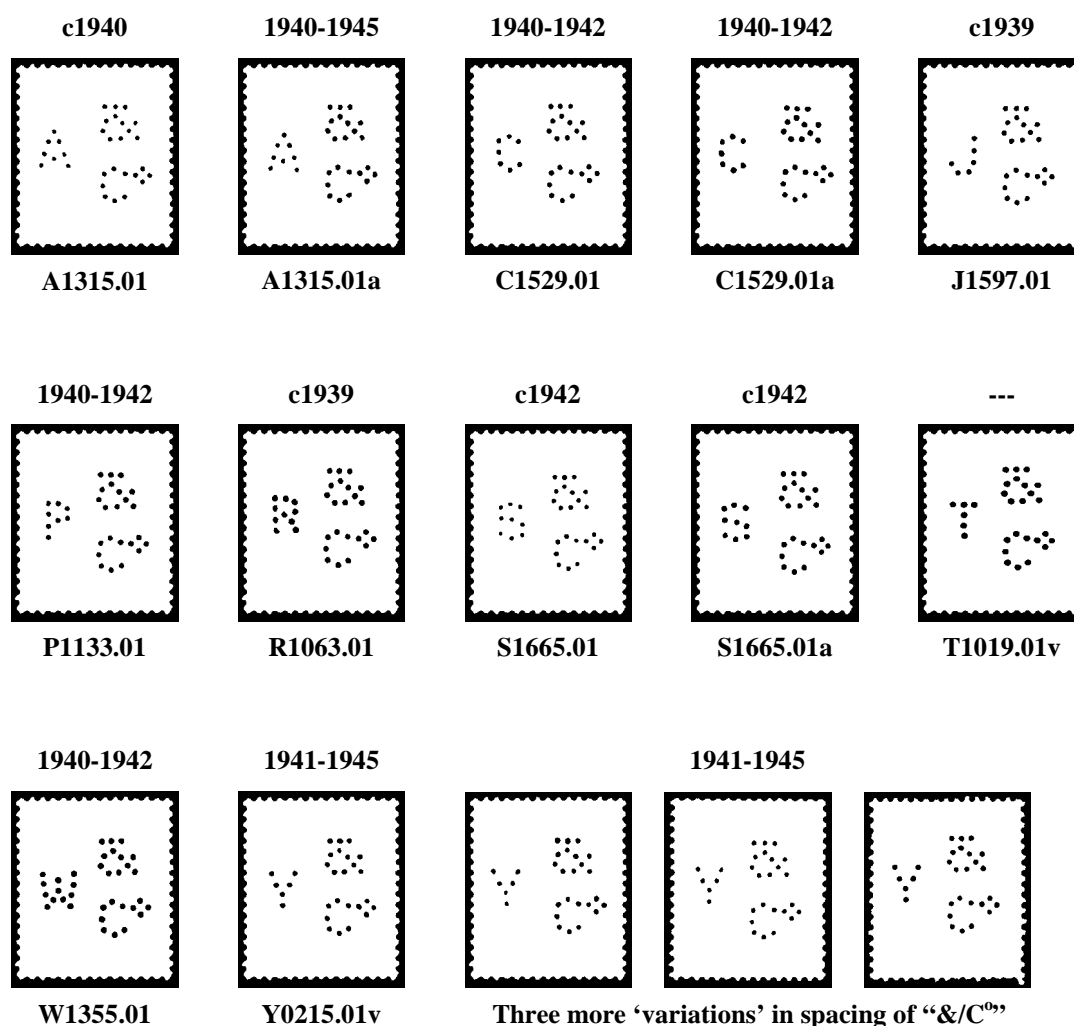

Sloper's unusual "&/C^o" dies.

Original article published in the Perfin Society Bulletin N^o. 317 (April 2002).

As we progress through the alphabet preparing details for the 'New Illustrated Catalogue'*, we often provide answers to some of the known puzzles but in the process we can also pose others. One such 'poser' is the small group of Sloper dies with the unusual, and seemingly rare, form of "&/C^o" placed to the right of a single letter. To date only *twelve* dies have been reported showing this layout - see silhouettes below.

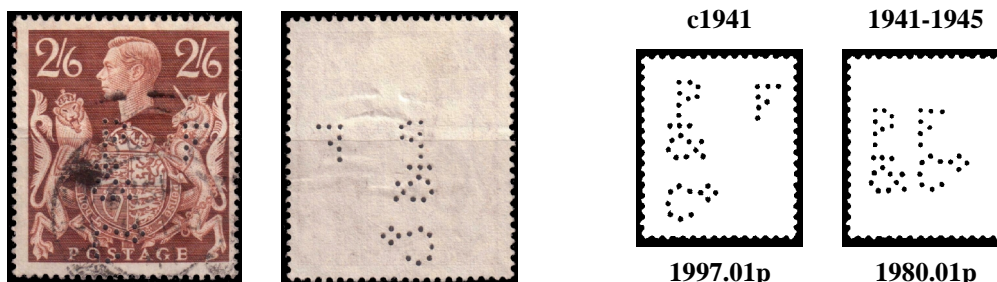

* Now completed and issued as the 'Gault Catalogue of G.B. Perfins', 13th March 2018.

For convenience, they have been shown against the background of a definitive sized stamp, although some are only known on large format, high value stamps. All known details are shown in the table that follows, and are correct to **23rd May 2019**.

Unfortunately, none of the dies have yet been positively associated with a user, and only one dated example has so far been reported - **4th November 1942** on "Y[&/C]" (Y0215.01v). However, pairs of both A1315.01 and A1315.01a have been reported by *Ian Hamill* and show they are probably **not** Sloper Wartime Provisionals (*SWP's*) as the patterns match each other within their pairs. But, if they're not *SWP's*, then what on earth are they doing here?

Well, a *thirteenth* example has been reported, (in May 2019 by *Jeff Turnbull* who spotted it on e-Bay), which bears the unmistakable characteristics of a *SWP*. For example, the holes to the “P” are smaller than the others, and the “F” is out of horizontal alignment with the “P”. Like many in the series it’s on a KGVI high value stamp, a 2/6d (br) issued 4th September 1939, which was replaced by the 2/6d (ye-gn) 9th March 1942, so only available for 30 months or so. Unfortunately, the postmark isn’t distinct enough to tell where or when it was used, but a reasonable estimate would be c1941. The Perfin has been catalogued as P1997.01p.

This is likely to have been an early attempt by J Sloper & Co to perforate “PF/&C^o” (P1980.01p) - typical example shown for reference - which is known used by ‘*Price, Forbes & Co Ltd*’, Insurance Brokers, Arthur St, London EC4.

Table of ‘similar’ dies

	Cat No.	Letters	Die in use	Stamps	Comments
1	A1315.01	A[&/C ^o]	c1940	‘Q’ 2/6d (br), 5/-

If you know of any more examples or details not on the list,
please let the **Catalogue Editor (Roy Gault)** know!

Late Use of Sloper Wartime Provisionals.

Over a period of time 'Standard' dies were made to satisfy orders from customers rather than employ the time consuming technique of using single letters and/or groups of letters to produce the desired set of initials. No doubt, demand played a part in deciding which dies would be replaced sooner than others. In the absence of dated material, a Sloper Wartime Provisional will have *by default* a start date of 1941, and an end date of 1945.

Just for the record, the earliest known date on a SWP is **15th May 1941** on "NB/IC⁰" (N0350.04p). Sloper's Works in Budge Row (where stamp perforation was carried out) was 'Blitzed' during one of the many air raids on London carried out by the Luftwaffe. The air raid in question took place on the night of the 10th May 1941 and into the early hours of the next morning, resulting in the loss of most, if not all, of Sloper's 'in house' perforating dies.

However, dated material proves that the SWP technique of using multiple dies to create the desired set of initials continued in a few cases into the early 1950s. The stamps usually found with Sloper Wartime Provisionals are the King George VI dark colours and high values (Issue 'Q'), and the King George VI light colours (Issue 'R'), but the rare appearance on King George VI changed colours (Issue 'S', issued 1st May 1951), proves use into the early 1950's.

The following are known with *latest dates in the 1950's*:

S0500.01p	S/B	10 Jan 1950	L4980.01p	L/SC	16 Jan 1951
L4190.01p	LN/S	2 Feb 1950	S3400.01p	S/H	8 June 1951
A5170.01p	AS/P	7 June 1950	R5270.01p	RT/F	9 Sep 1951
U0400.01ap	UC/C	2 Oct 1950	K0300.02p	K/CC	3 July 1952

This piece postmarked St Helens, Lancs, **8 JUN/1951**, shows a 1d 'R' with "SH" (S3360.01M) accompanied by a 1/2d 'R' with "S/H" (S3400.01p).

The following are known on **Issue 'S'**, showing use in **1951 or later**:

A1300.03ap	A/&C ⁰	1½d
K0300.02p	K/CC	½d, 1½d, 2d, 2½d
L2160.01ap	LF	2½d, 4d - issued 2 nd Oct 1950
W0620.01ap	WB/D	2½d

The latest known use is **3rd July 1952** on "K/CC" (K0300.02p).

***If you have any Issue 'S' stamps with a Sloper Wartime Provisional,
please send a scan to Roy Gault for use here!***
